Date: 21/12/2022

To

The Registrar,

Andhra University,

Visakhapatnam.

Respected Sir/Madam,

Sub:- Requesting your kind consideration into the revision of the Syllabus for BCA – Reg.

This is to bring to your kind notice that, as per our internal feedback from various stakeholders including our students, a classroom and industry related gap is identified as the syllabus for BCA does not meet the current IT industry requirements.

The current industry is looking for graduates having strong Programming Skills in the latest programming languages like Python. As per the current curriculum, Python is not included in any of their semester curriculum and hence students are falling short of this knowledge when they appear for interviews at IT Companies.

So I kindly request you to look into this for making necessary changes to the current curriculum to include the latest programming skills like Python, especially for BCA students, as their carrier is related to IT industry and thus enabling them to grab better opportunities.

Thanking You,

Yours Sincerely,

PRINCIPAL
