

21 - 25 November 2023 : Bell of Arms Visit

Forensic science students from Aditya Degree and P.G. College embarked on an enlightening visit to the Kakinada Superintendent of Police (SP) Office. This visit was designed to enhance the students' understanding of firearms, their history, and characteristics. Two experienced police officers graciously took the time to educate the students on various guns and their forensic significance. Various guns like Rifle303 ,SLR 7.62mm rifle, AK47, INSAS 5.56mm assault rifle, 9mm SAF carbine, 9mm Pistol, 9mm Glock 17 pistol. The officers delved into the history of firearms, elaborating on their impact on criminology and forensic investigations. The discussion covered landmark cases where firearm analysis played a crucial role in solving crimes, emphasizing the importance of forensic expertise in such investigations. The visit focused on the forensic significance of firearms and the role they play in crime scene investigations. Students learned about the analysis of ballistic evidence, including the examination of bullet trajectories, gunshot residue, and firearm identification, which contribute to solving crimes and ensuring justice. Following the presentation, students actively engaged in a question and answer session, seeking clarification on topics ranging from firearm ballistics to forensic methodologies. The officers provided insightful responses, encouraging an open dialogue between law enforcement and forensic science perspectives. The visit to the Kakinada SP Office proved to be a valuable.
